DETAILED ACTION

Amendment

1. Receipt is acknowledged of the amendment filed 26 August 2003 and correct drawing filed 10 July 2003.

Allowable Subject Matter

2. Claims 1-4 and 6-49 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The best prior art of record of Lang and Drupsteen teaches security access modules (SAMs) but fails to teach the specific method of supporting mutually exclusive program execution, including the specific interactions of the SAM and computing application environment. The method/system comprises a first and second component operating in parallel, the first component comprising a SAM, the second component comprising a computing application environment used with downloaded data or firewall-protected random access data, all of which are regulated by the SAM (a non-obvious improvement over the prior art).

Hence the best prior art of record fails to teach the invention as set forth in claims 1-4 and 6-49 and the examiner can find no teaching of the specific system and method of the security application module, nor reasons within the cited prior art or on her own to combine the elements of these references other than the applicant's own reasoning to fully encompass the current pending claims. In addition, see applicant's reasoning in amendment/response filed 26 August 2003.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
